Capability Statement

About Us

Camin Civil is a family-owned and operated civil earthmoving company specialising in supply of final trim earthmoving plant and equipment, project supervision and support. We take pride in supporting a wide range of projects, such as road construction, shoulder widening, full overlay, bridge abutments, grade-separated interchanges, railways, airports, and mine site infrastructure.

Founded in Western Australia in 2019, Camin Civil leverages over 15 years of industry experience within the construction and mining sectors Australia-wide. Camin Civil continues to run in Western Australia and has since expanded into South Australia and Queensland. The quick expansion of our small business has been made possible by our dedicated and experienced team working tirelessly to provide a quality service to our clients.

At Camin Civil, we prioritize quality over quantity, employing only passionate, highly skilled professionals with keen attention to detail. This ensures we provide our clients with competent, hardworking individuals who consistently add value to every project.

Our Services

→ Final Trim

→ Dry Hire Equipment

→ Labour Hire

Final Trim

Our operators have extensive experience working with a wide variety of pavement materials across Western Australia, South Australia, Queensland, and the Northern Territory. They specialize in balancing, mixing, and trimming these materials to meet each client's design and specifications, allowing us to build projects from the ground up efficiently. Using a range of methods, including blade mixing, pug mills, and stabilizers, we ensure optimal use of time and resources, providing high-quality results.

The Camin Civil fleet includes late-model, low-hour machines, such as Caterpillar 140M and 150 graders and D6 Dozers equipped with Trimble GPS and UTS technologies. By maintaining a modern fleet and conducting regular servicing and maintenance, we minimize downtime, saving both Camin Civil and our clients time and money. This commitment to reliability and cost-efficiency makes Camin Civil a trusted solution for your project needs.

Labour Hire

At Camin Civil, we understand that having the right personnel is crucial to the success of any project. That's why we offer labour hire services to meet the diverse needs of our clients.

By choosing Camin Civil for your labour hire needs, you gain access to a pool of dedicated professionals committed to delivering exceptional results. Our focus on quality and reliability ensures that you have the right team in place to meet your project goals effectively.

- **Skilled Operators:** Our labour hire service provides skilled operators experienced in handling various earthmoving equipment. They are trained to work efficiently and safely on all types of projects, ensuring high-quality outcomes.
- **Site Supervisors:** We supply experienced site supervisors who possess extensive knowledge in project management, cost saving and compliance. They are dedicated to overseeing operations, maintaining safety standards, and ensuring that projects run smoothly from start to finish.

- **Flexibility and Scalability:** We offer flexible labour hire solutions tailored to the specific requirements of each project. Whether you need additional personnel for a short-term project or ongoing support, we can scale our services to fit your needs.
- **Safety and Compliance:** All our personnel undergo safety training and adhere to industry regulations. We prioritise safety on all job sites, ensuring that our workers contribute to a secure work environment.
